Colorado Construction Company Awarded City of Longmont Contract

Denver, CO -- February 8, 2006 -- **dcb Construction Company, Inc.**, a locally owned and operated construction company since 1960, was awarded the first phase of the City of Longmont's new Municipal Training Center located at 111 1st Avenue in Longmont, Colorado. Construction on this masonry project began January, 2006 and is scheduled for completion June, 2006.

The first phase, funded jointly by the City of Longmont and a three year sales tax, approved by Boulder County taxpayers in November, 2001, is one of three new fire training facilities that will soon be available to the 26 fire departments in Boulder County. The "Fire Phase" of this new facility includes 1,680 square feet for a Burn Building, 2,200 square feet for a Training Tower and 800 square feet for a Pavilion. Longmont Foods, a division of ConAgra, donated more than 6 acres of the 13 acre site to the City of Longmont.

The need for new fire training facilities was brought to the attention of County Commissioners in 2000. "The existing fire training facility in north Boulder had become difficult to utilize without impacting the neighborhoods which had developed around it and it was in need of extensive repairs," said Scott Snyder, City of Longmont Fire Department's Division Chief of Operations. "The City of Longmont has never been able to use the north Boulder site as frequently as we would have preferred simply because of the distance from Longmont. The construction of one of the 3 new county facilities in Longmont will have a significant positive impact on our training programs," Snyder added.

The Longmont Fire Department, managed by Fire Chief Steve Trunck, currently employs 75 firefighters.

Locally owned and operated since 1960 and ranked one of the top ten design-build firms in the State of Colorado, **dcb Construction Company, Inc.** is a full-service building contractor engaged in the design and construction of build-to-suit commercial, industrial, office, retail, warehouse and distribution facilities for owners, users and developers across the Front Range. **dcb's** services include negotiated, design-build, design-assist and select bid.
