### **Local Construction Company Awarded Innovative Private Parking Facility at DIA**

Denver, CO -- July 14, 2005 -- **dcb Construction Company, Inc.**, a locally owned and operated construction company since 1960, has been selected by Airport Resort Parking LLC to design and build a phased pre-engineered metal private parking facility located at 7779 Harry B. Combs Parkway at Denver International Airport (DIA). Construction begins in late July on the first 30 units, with a scheduled completion date of late October, 2005. The phased project will total 347 private garages consisting of approximately 96,400 square feet.

The exclusive private parking garages, developed by Airport Resort Parking LLC in conjunction with Managing Partner L.C. Fulenwider, Inc., will be available for 5, 10 or 20 year leases. The completely contained garages will feature personal garage door openers, car service and detailing, access key pads and on-call shuttle service to the airport terminals. The garages will sit across from Signature Flight Services, DIA's business and private jet terminal.

"DIA is the only major airport in the nation to offer this type of private garage parking and we are extremely excited to break ground," stated Barry A. Sherman, dcb Vice President of Design / Principal. "An amenity of this magnitude will only enhance our City's reputation of having one of the premier international airports in the world," Sherman added.

A respected Colorado builder since 1960, **dcb Construction Company, Inc.** began concentrating on design-build projects from its inception and today is ranked one of Colorado's premier top ten design-build firms by Colorado Construction Magazine, 2005. **dcb** is currently celebrating its 45th anniversary of providing design-build construction services throughout the state of Colorado.
